

## **Ediga Suresh Goud**

Mobile No: 9908613161

E-mail: sureshgoudediga36@gmail.com

### **Professional Summary:**

- **Java Developer** with **3+ years** of experience in application development, maintenance, and support.
- Expertise in **Java, Spring Boot, Microservices, REST APIs, Hibernate, JPA** on the backend.
- Proficient in Web Technology (**Html, CSS, JavaScript**) for full-stack web development.
- Having knowledge of **JavaScript (ES6+), React Hooks, Redux, Context API, REST API integration**.
- Experience in **Microservices architecture, AWS pipelines**.
- Experience in **Git, GitHub** for version control and CI/CD automation.
- Strong understanding of **Agile (Scrum) methodologies** for project development.
- Experienced in **deploying and managing applications on AWS**.
- Strong problem-solving, analytical, and communication skills.

### **Academic Details:**

- **Bachelor of Technology (B. Tech)** in **A1 Global Institute of Engineering and Technology, Markapur**.

### **Professional Experience:**

#### **Software Engineer**

**Sonix Human Capital Solution, Hyderabad (January 2022 – March 2025)**

#### **Technical Skills:**

- **Programming Languages:** Java, JavaScript
- **Backend:** Java, Spring Boot, Microservices, REST API
- **Frontend:** HTML5, CSS3, Bootstrap

- **Databases:** MySQL
- **Cloud Services:** AWS (EC2, S3, API Gateway)
- **Version Control:** Git, GitHub, GitLab
- 

### **Significant Projects Handled:**

#### **Project: Wells Fargo – Online Consolidation Strategy**

**Role:** Full Stack Developer

**Technologies:** Java 8, Spring Boot, REST API, Hibernate, MySQL, MongoDB, Docker, AWS, Git

**Description:** This project aimed to enhance Wells Fargo's web platform to align with compliance and business strategy. It serves as the front-end interface for clients accessing mortgage services.

#### **Responsibilities:**

- Developed and maintained **RESTful APIs** using **Spring Boot**.
- Built **React.js** components and implemented state management using **Redux**.
- Integrated **MySQL** databases for efficient data management.
- Developed reusable **React UI components** with **Tailwind CSS** and **Bootstrap**.
- Integrated **third-party APIs** and developed authentication mechanisms using **JWT** and **OAuth**.
- Performed **unit testing** using **Jest**, **JUnit**.
- Deployed applications on **AWS** using **EC2**, **S3**.
- Actively participated in Agile **Scrum ceremonies** including sprint planning, daily stand-ups, and retrospectives.

#### **Project: Daimler – Mediation (Mercedes Connect Me)**

**Role:** Full Stack Developer

**Technologies:** Java, Spring Boot , MySQL, AWS, Microservices

**Description:** Mercedes Connect Me is a telematics web and mobile application that allows customers to interact with their vehicles, access diagnostics, and manage vehicle features remotely.

#### **Responsibilities:**

- Designed and developed **RESTful APIs** using **Spring Boot** and **Node.js**.
- Developed **React.js** components for user-friendly UI/UX.
- Managed **MongoDB** for storing real-time vehicle data.
- Integrated external APIs for **remote diagnostics and vehicle tracking**.
- Implemented **authentication and authorization** using **JWT/OAuth**.
- Deployed the application on **AWS** using **EC2, API Gateway**.
- Used **Docker and Kubernetes** for containerized deployment.
- Wrote **unit tests** and performed **code reviews** for quality assurance.

**Personal Skills:**

- Quick learner and adaptable to new technologies.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
